

TeamViewer – Setup Unattended Access

Would you like permanent access to a remote computer? We'll show you how in three easy steps.

Installation (remote PC)

Install TeamViewer by following the instructions of the installation routine, and then launch TeamViewer. Click on the "Connection" menu at the top of the TeamViewer window and select "Setup unattended access …".

Configuration (remote PC)

In the first step, set a computer name and password for the remote computer.

In the second step, you can add this remote computer to your Computers & Contacts list (refer to "TeamViewer - Use the Computers & Contacts List").
